

Gauge Pole Cover

AW Hudson's Gauge Pole Cover greatly reduces VOC emissions from escaping through the slotted gauge poles.

The opening in the storage tank roof through which the guide pole passes, as well as the slots in the guide pole, constitutes visible gaps through which VOC's freely escape. Tank Owners can be proactive about reducing emissions at a low one-time cost.

- Made of Strong Urethane Laminate
- For use in IFRT's and EFRT's
- Can be installed with tank in service
- Custom made per tank design
- AW Hudson's Urethane Laminate already used by major oil refineries
- Freely use gauging and sampling equipment
- Zipper allows for easy installation
- Transition box available upon request
